ABOUT ME

Hi, I'm an experienced software developer specializing in web technologies. I believe in CI, CD, starting small and building up, and continuous learning. I also prefer tabs.

SKILLS

ES5/6/7, TypeScript, Node.js, HTML, Sass, Angular, AngularJS, Express, Git, Bash, Ubuntu, MacOS

EXPERIENCE

Staff software developer/Team lead, IBM, Markham, ON 2017 Present

Lead team of 14 developers to deliver new SaaS product: Watson Supply Chain Insights Operations Center (released on schedule December 2017). Drive technology decisions, software patterns, establish best practices, and coach team members.

Front-end developer, IBM, Markham, ON 2015 2016

Worked on an internal org wide component library. Time split between bug squashing, designing and development of components, automating processes, community and repo management, building and maintaining build infrastructure, and delivery pipeline.

Web developer, Higgins Ai., Toronto, ON 2014 2015

Jack of all trades type of role at very small start-up focusing on the tablet POS space. Time split between developing product features, bash scripting, Pi building, research, customer support, on-sight installation, and trouble-shooting.

EDUCATION

Seneca College @ York Campus, North York ON — Diploma in Computer Programming, 2015

INTERESTS OUTSIDE OF SOFTWARE

Reading, motorcycles, photography, Rick and Morty
